

## **nAppliance Networks Partners with Sonasoft to Deliver Exchange Archiving Appliance**

*nAppliance and Sonasoft address a key market need for email archiving appliance*

San Jose, California – April 1, 2009 - **nAppliance Networks**, a leading provider of cost effective infrastructure management and security appliances for the SMB and Enterprise markets, announces that it has teamed up with **Sonasoft Corp.**, provider of SonaSafe Integrated Archiving, Replication, and Backup software to introduce enterprise class Exchange Email Archiving Appliances that lower the TCO of Archiving for Enterprise customers, and make Enterprise level archiving affordable for the SMB market. The product, dubbed the Net-Archiver SonaVault series of appliances, enables businesses of all sizes, big or small, private or public to safeguard against future litigation risks, effectively scale and optimize the exchange server storage infrastructure, and improve simple day to day employee email records and access management.

“By partnering with Sonasoft we are providing an enterprise class email archiving solution which is cost effective, and at the same time very function rich. The market is waiting for a state of the art archiving appliance solution that will effectively help index, preserve, and simplify day to day employee and email records and access management, achieve regulatory and eDiscovery compliance, and meet business continuity needs of organizations of all sizes at an affordable price. Our nAppliance team is really excited about this partnership and we are glad that we will be offering a unique appliance solution to the marketplace.” said Billy Bath, Director Business Development of nAppliance.

### **Comprehensive Email Archiving**

Built using future-proof software components from Microsoft and Sonasoft, SonaVault appliance is an "all-in-one", cost-effective, scalable and tamper-proof Microsoft Exchange archiving platform. It effectively indexes, preserves, and manage all emails, achieving regulatory compliance and meeting business continuity needs of organizations of all sizes.

- **Purpose-Built, Comprehensive Exchange Archiving Appliance Platform:** An All-In-One Email Life Cycle management system which combines the power of e-mail retention, eDiscovery, storage management, and disaster recovery without the deployment complexity or high costs typically associated with other Tier-1 e-mail archiving solutions. It is designed to accomplish more with less efforts, expense, training and infrastructure.
- **Comprehensive Archiving and Granular Access Policy Control:** Retains a fully indexed copy of every incoming and outgoing message and provides granular role based access control to users, administrators, and auditors with convenient self-search and retrieval of any message stored in an organization's email archival system.
- **Helps Meet the Most Demanding Compliance Regulations:** Helps meet regulatory requirements for industries such as financial services, healthcare, educational, government, and other industries. It helps to minimize costs associated with legal discovery through its robust search and reporting capability.
- **Easy to Use, Easy to Deploy Appliance Platform:** Helps to increase productivity by reducing deployment complexity.

“We are extremely delighted to partner with nAppliance and this will benefit everyone in the value chain -- channel partners, distributors and resellers. An Email Archiving appliance built on a robust server will open up tremendous opportunity for channel partners and will offer an affordable, plug & play solution for the end-user. We’re confident that this partnership will be mutually beneficial to both the companies and to our customers,” said Andy Khanna, President & CEO of Sonasoft.

### **Pricing and Availability**

The nAppliance Net-Archiver SonaVault series of appliances are available in five models: nAppliance Mail Archiver 2110, 2125, 2250, 3110 and 3220. Model-2110 is priced at \$5,999 in the U.S. which includes 100 mailbox licenses. International pricing varies by region.

## **About Sonasoft®**

Sonasoft Corp. provides compliance, disaster recovery and data protection solutions for the Microsoft platform. Sonasoft is the only company that provides a three in one solution, namely, archiving, replication and backup as part of an integrated solution. Typically, customers have to buy multiple solutions from different vendors to get similar capability. Also, it would cost three to four times more to get comparable functionality offered by Sonasoft's SonaSafe solution.
